### A NEW GENERATION LIGHTING THE WAY

IIPSA has raised the standards of the Mexican electricity industry to new horizons. They design and implement solutions with impeccable, highly specialized service, efficient management and a solid infrastructure.

They carry out diagnosis, conservation, proactive and corrective maintenance programs for electrical distribution systems.

With a unique understanding of the executive compilation of the laws and regulations of the Energy Reform, decrees, agreements and complementary provisions issued by the Ministry of Energy and the Energy Regulatory Commission of México to guide its clients with advice, management and procedures before dependencies government agencies such as the Federal Electricity Commission, the National Center for Energy Control, the Energy Regulatory Commission, among others.

### AREAS OF EXPERIENCE

1. Power: where they develop power substations, maneuvering substations, and transmission lines.
2. Industrial: they carry out management before CFE, civil engineering, electromechanics, studies and energization.
3. Solar power generation.
4. Wind power generation.

### HOW IT CAN HELP YOU

- In the integration of electrical infrastructure systems: from high voltage 400Kv to medium and low voltage distribution systems.
- In management for the connection and interconnection of projects to the National Electric System before the regulatory authorities.
- In the implementation of renewable energy to your industrial processes.

# Your best partner to do business in North America.
